MANROSE®

Manrose Manufacturing continues to maintain its position at the forefront of the ventilation and fan equipment market. The company has been manufacturing practical, reliable ventilation equipment for 30 years and credits its success to a simple philosophy of offering cost-effective, innovative products to suit any requirement.

Manrose's research and development team has consistently produced products that stand out from the rest, bringing them to market through a team of experienced professionals who understand the needs of our customers. Our policy of ongoing investment in product development has been a key force in driving the company to the top of the ventilation fans and equipment market.

Our facility in Reading is divided into administrative, sales and assembly areas, and is responsible for logistics on an ever-growing product range of over 2000 items.

Thanks to an understanding of local needs and standards, Manrose are able to design products that are ideally suited to UK installers and fully compliant with the latest legislation and regulatory standards. This commitment to quality has also enabled us to make highly profitable inroads into the Far Eastern markets, reversing the general trend and creating more exports for the UK. This is clear evidence that the benefits of innovative design, ease of installation, energy efficiency and sensible pricing we bring to the UK market are also appreciated further afield.

At the heart of Manrose's operation is a total commitment to the UK market, evidenced by the ongoing expansion of manufacturing facilities. Our production facility operates 32 state-of-the-art moulding machines, ranging from 25 tonnes to 450 tonnes, with the recent addition of new 100 Ton, 250 Ton and 270 Ton machines. Our capabilities also include three extrusion machines for rigid flat channel ducting, as well as three machines for the production of flexible PVC and one machine for Semi Rigid aluminium foil ducting.

A sealed cooling system for the machinery allows the facility to operate its 18 fan assembly, and 8 kitting and packaging lines 24 hours a day, developing and manufacturing new families of fans encompassing domestic, commercial and industrial applications. The facility includes fully automated drying and material feed system, an automatic colour dosing system and state of the art conveyor systems that delivers mouldings to a central position for sorting, checking and packing.

Close to the M4 in Reading, our fleet of vehicles provides fast access to the country's main arteries, ensuring quick delivery from our extensive warehouses.

Manrose's innovations are the result of listening to customers and understanding their needs. With energy efficiency now a prime consideration, and often compulsory for new buildings, we have ensured that all of our products offer optimum performance, as well as introducing added value features such as the humidistat controlled fan.

The humidistat fan is controlled in relation to humidity levels in the space rather than a pre-set run time so the fan keeps running until the humidity goes below the set point. This ensures that the space is thoroughly ventilated without wasting energy through over-ventilating. Similar efficiency improvements are afforded by our occupancy-controlled fans, which switch off when the space has been vacated for a pre-set time. By enabling fans to interact with their environment in this way, Manrose provides end users with a high level of comfort with minimal cost of ownership.

Useful Information

The Problems Caused by Poor Ventilation

Stale Air

Stale air can be caused by cooking smells, smoking, odours remaining in the bathroom, a general lack of ventilation around the house as well as a damp atmosphere.

All these problems cause an avoidable level of discomfort as well as the risk of respiratory illness and general poor health.

Condensation

Problems occur when steam from the kitchen or bathroom finds cooler surfaces around the house on which to condense. Attempts to conserve heat by sealing windows - and therefore reducing natural ventilation - makes this problem even worse.

Condensation can cause considerable problems from peeling wallpaper and mould growth to severe structural damage such as wood rot and damp.

Solving the Problems

Building Regulations

The Building Regulations Document F1 outlines the importance of ventilation and stipulates that mechanical ventilation must be installed in kitchens, bath/shower rooms and toilets.

All Manrose fans comply with or exceed current Building Regulations and our intermittent fans are capable of extracting no less than 60 litres per second from kitchens and no less than 15 litres per second from bath/shower rooms. Our continuous running fans have a minimum high rate of 13 l/s. This means that humidity is removed at source before it can reach the cooler part of the dwelling and cause damage.

Specific requirements of The Building Regulations Document F1 on ventilation are as follows:

- Bathrooms/Shower Rooms:**
The Regulations require an intermittent fan capable of minimum extract capacity of 15 litres per second/54m³/hr, or a continuous running fan capable of a minimum high rate of 8 litres per second/46m³/hr when installed.
- Toilets (Separate From a Bathroom):**
The Regulations require a fan capable of a minimum extract capacity of 6 litres per second/21m³/hr, or a continuous running fan capable of a minimum high rate of 6 litres per second/21m³/hr when installed. N.B. If a room does not contain an openable window the fan should be fitted with a 15 minute over-run timer.
- Kitchens:**
The Regulations require an intermittent fan capable of extracting 30 litres per second (adjacent to the hob) or 60 litres per second elsewhere. A continuous running fan must have a minimum high rate of 13 litres per second/28m³/hr.
- Utility Rooms:**
The Regulations require an intermittent fan capable of extracting 30 litres per second/108m³/hr when installed. A continuous running fan must have a minimum high rate of 8 litres per second/46m³/hr.

MEV & MVHR Continuous Ventilation Rates

Extract Ventilation Rates			
Room	Intermittent Extract	Continuous Extract	
	Minimum Rate	Minimum High Rate	Minimum Low Rate
Kitchen	30 l/s adjacent to hob; or 60 l/s elsewhere	13 l/s	Total extract rate should be at least the whole dwelling ventilation rate given in the table below
Utility	30 l/s	8 l/s	
Bathroom	15 l/s	8 l/s	
Sanitary Accommodation	6 l/s	6 l/s	

Whole Dwelling Ventilation Rates					
	Number of bedrooms in dwelling				
	1	2	3	4	5
Whole dwelling ventilation rate	13	17	21	25	29

Note.

The minimum ventilation rate should be not less than 0.3 l/s per m² of internal floor area.

Siting the Fan Correctly

A fan should always be sited in the furthest window or wall from the main source of air replacement to avoid short-circuiting the airflow. It should be located as high as possible in the window or wall nearest to smells or steam, but not directly above eye-level grills or cooker hoods.

If the room contains a fuel burning device (such as a gas boiler) with a non-balanced flue, it is essential that there is enough replacement air to prevent fumes being drawn down the flue when the fan is extracting to its utmost capacity.

IEE Regulations (U.K.) require that a conventional mains voltage fan in a bathroom or shower must be located where it cannot be touched by a person using the bath or shower and well away from any water spray.

Alternatively, the Manrose range of 12 volt S.E.L.V. (Safety Extra Low Voltage) or IPX5 fans are specifically designed for the safe ventilation of toilets, bathrooms and shower rooms and can be fitted within the splash area with absolutely no risk of electric shock.

Choosing the Right Manrose Fan

Remember

- Axial Fans are designed to move air over short distances i.e. window fixing or through wall mounting. Available in 100mm, 125mm, 150mm, 225mm and 300mm sizes (4", 5", 6", 9" and 12").
- Centrifugal Fans are designed to move air over longer distances and will perform well against the pressure caused by long lengths of ducting and resistance by grilles. N.B. When ducting vertically it is recommended that a condensation trap is used.
- Humidistat Controls: Manrose have a complete range of integral humidistat controls on their fans, they are also available with a pull cord override switch. A remote mounted model is also available (1361). All are designed to switch on the fan as the humidity rises in the bathroom and off as it falls. It will continue to monitor the humidity 24 hours per day, thus preventing mould growth on ceilings and walls and drastically reducing condensation problems.

To calculate the correct fan required for a particular room you need to know the room volume in cubic metres i.e. length x breadth x height and then multiply by the number of air changes required.

	Example 1 Bathroom	Example 2 Kitchen
Room		
Volume	2.0 x 2.0 x 2.0 8m ³	2.8 x 2.8 x 2.8 22m ³
Number of Air Changes Required	6	10
Performance	8 x 6 48m ³ /h	22 x 10 220m ³ /h
Fan Required	XF100T 85m ³ /h	WF150A 220m ³ /h

Minimum Air Changes Required Per Hour

Cafés.....	10	Meeting Rooms.....	4
Canteens.....	8	Offices.....	6
Cellars.....	3	Restaurants & Bars.....	6
Changing Rooms with Showers.....	15	School Rooms.....	2
Conference Rooms.....	8	Shops.....	8
Garages.....	6	Sports Facilities.....	6
Hairdressing Salons.....	10	Store Room.....	3
Halls & Landings.....	3	Toilets - Public.....	10
Hospital Rooms.....	4	Utility Rooms.....	15
Kitchen - Domestic.....	10	Workshops.....	6
Laundries & Launderettes.....	10		

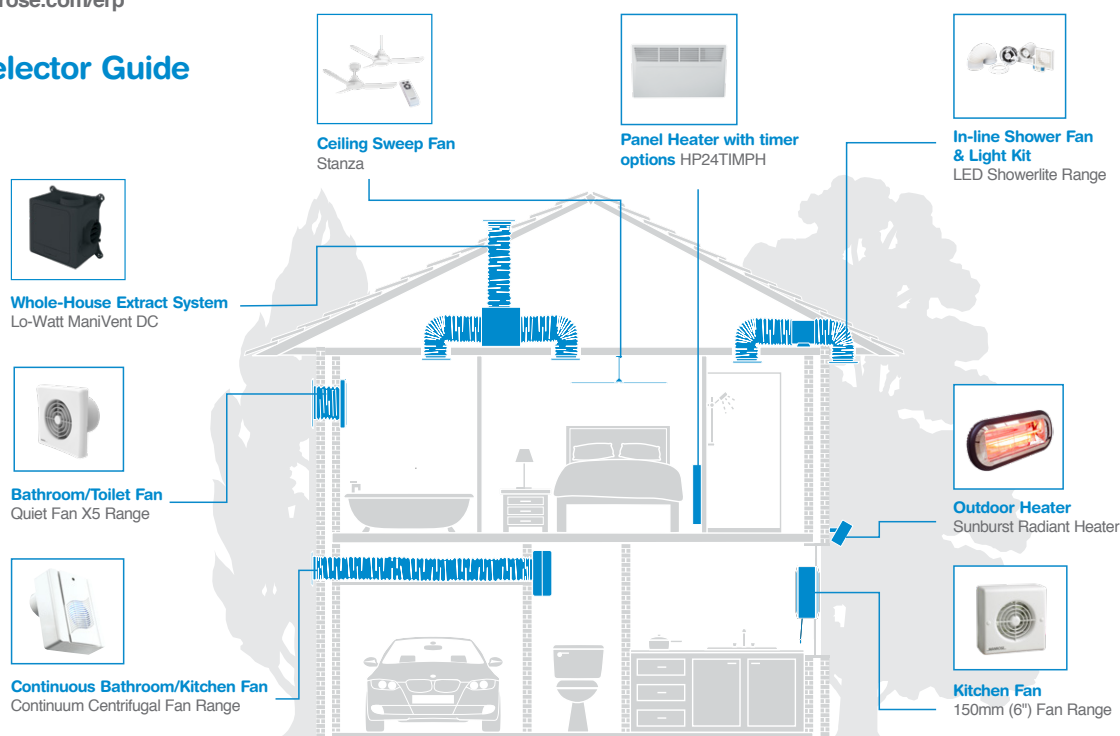

Stale air is also removed by installing the appropriate Manrose fan. In certain circumstances, such as toilets, a timer is incorporated to provide an automatic run-on period of 15 minutes as stipulated in The Building Regulations.

ERP (Energy Related Products Directive)

As a part of the EU's commitment to achieving a 20 per cent energy saving by 2020, from January 2018, all local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. Local space heaters can meet these new regulations by using a number of different integrated control methods.

From January 2016, with updates from January 2018 new residential and non-residential ventilation units are subject to the requirements of the Ecodesign Directive. Residential products with power consumption greater than 30 Watts require an energy label and all products must meet certain performance criteria. Full details are available on our website at: www.manrose.com/erp

Fan Selector Guide

Types of model

- Standard. For remote switching through wall light or separate switch.
- Timer model with built-in adjustable time delay operated by the light switch.
- Pullcord model with built-in pullcord switch.
- Humidity controlled models with built-in adjustable sensor which operates the fan automatically.
- P.I.R. model sensitive to movement. Switches on when room is entered and off when room is vacated.

MANROSE MANUFACTURING LIMITED, UNIT 23, 53 SUTTONS PARK AVENUE, EARLEY, READING. RG6 1AZ

Manrose is the UK's fastest growing manufacturer of domestic ventilation fans and equipment. As such, we have made a major impact on the ventilation industry. Our fans and equipment are of such high quality that we unhesitatingly offer a 3 year 'no quibble' guarantee. ISO9001:2008 Accredited.

Every care has been taken in the preparation of this catalogue and whilst all steps have been made to ensure that the information is accurate, we cannot be held responsible for any inaccuracy connected to the use of this information or in respect of any matters arising therefrom.

A copy of our terms and conditions of company sales is available upon request.

PRODUCTS ARE AVAILABLE UNTIL FURTHER NOTICE

Retail

- The latest clear PVC packaging for Manrose fans and kits is stylish and practical, whilst retaining its durability.
- The design is eye catching and sets the product off to its best advantage, a priority for the fast growing retail electrical DIY market.
- Displayed on Euro-slots, self-stacking or free standing, the packs are clearly identified for customer awareness and are available in popular 100mm (4"), 120mm (5"), 150mm (6") and 230mm (9") diameters. Packed in outers of 5, the packs are security sealed and carry clear instructions for simple installation.
- All our Flat Channel Ducting accessories are packed in poly bags with a euro slot style header. These fit easily onto retail stands and featuring the Manrose header card layout and colouring, clearly displaying the product information leading to greater customer product awareness.

PVC Packaging - Presentation is Everything

New Products

Quiet Fan X5 Conceal

The Manrose Quiet Fan X5 Conceal is the latest in domestic ventilation to incorporate a high extraction rate whilst producing an incredibly quiet running volume all with the additional flexibility of being IPX5 compliant. IEE Regulations (U.K.) allow for IPX5 fans to be installed into zone 1 without the need for low voltage transformer making this comprehensive range ideal for bathrooms and toilets.

See pages 14-15

Lo-Watt ManiVent DC Whole-House Extract System

With the growing concerns about over ventilating properties, the Multispeed Multivent offers the option of 'Close Control' both in the residential and the commercial sectors. With a DC motor that can be set to ventilate any area up to 118 l/s, the Multispeed Multivent is one of the most efficient central extract units in the UK.

See pages 88-89

Stanza 48in Ceiling Fan

The Stanza fan is a stylish, modern ceiling fan, ideal for homes, offices, stores, shops and many other applications*. The precision moulded glass fibre composite blades give increased stability and higher airflow, working to cool the environment in summer months. In winter months, the Stanza can be set to Eco mode, which will gently recirculate heat from the ceiling towards occupants, therefore helping to conserve energy.

See pages 83

Sunburst Radiant Heater

The Sunburst radiant heaters are ideal for outdoor spaces as well as pubs, cafes, bars and restaurants. The heaters comes delivered with an easy-to-mount wall bracket and cable to speed up installation.

See pages 113

* Stanza 48in Ceiling Fan must be mounted above 2.3m

Part L Regulation Energy Saving Products 'Saving your money and our environment'

Energy Efficiency

There are Building Regulations dictating minimum airflow requirements (Approved Document F) and minimum energy efficiencies (Approved Document L). The new range from Manrose offers a complete product range and all designed to comply with the requirements. The regulations specify the maximum specific fan power permitted for all ventilation products. This is measured in Watts per litre per second of airflow extracted and all models in the new range comply.

The table below shows the maximum specific fan powers allowed to comply with the new building regulations.

Effective from 6th April 2014

New and replacement systems

1.0 Fan Power

- a. Mechanical ventilation systems should be designed to minimise electric fan power. Specific fan power (SFP = Watts / LPS) should not be worse than:
 - i. 0.5 for intermittent extract ventilation systems
 - ii. 0.7 for continuous extract ventilation systems
 - iii. 1.5 for continuous supply and extract with heat recovery ventilation systems

2.0 Heat Recovery Efficiency

- a. The heat Recovery efficiency of balanced mechanical ventilation systems incorporating heat recovery should not be worse than 70%

3.0 Controls

- a. Intermittent Mechanical extract ventilation systems should be operated by local manual switches or automatically by a presence sensor
- b. All other mechanical ventilation systems should have manual or automatic control of the boost facility

Installed Performance – It needs to comply

In the new regulations there is now a requirement for the installation to be signed off by a competent person. This will include airflow measurements. The new Green range from Manrose are designed to comply with the installation requirements as set out in the domestic Ventilation Guide as part of Approved Document F. When installing there are a few simple rules that will help as shown below:

Installation Introduction

This guide provides basic guidance for persons installing fixed ventilation systems in new and existing dwellings to help to comply with installation and commissioning requirements in part F and part L of the building regulations for England and Wales. Rectangular or circular rigid duct should be used wherever possible, if necessary, flexible ducts maybe used, however, these lengths should be kept to a minimum, connecting to rigid ductwork as soon as possible.

You are limited to a maximum of 1.5m of flexible ductwork when connecting to axial fans; for centrifugal fans you are limited to 6 metres (for extract rates of 6 to 30 l/s) and 3 meters (for extract rates of 31 to 60 l/s). You are able to incorporate up to 2 bends in a system up to 30l/s, this then reduces to 1 bend for higher extract rates.

Flexible ducting should be pulled taught to minimise resistance, this is considered to be achieved if extended at least 90% of the total duct length. Ductwork should be insulated when it passes through unheated areas and voids. Horizontal ducting, including ducting in walls, should be installed with a slight slope downwards away from the fan to prevent backflow of any moisture. Vertical ducting will require a condensate trap in order to prevent backflow of any moisture into the product.

✓ Do

✗ Don't

The inner radius of any bend should be greater or equal to the diameter of the ducting being used. If the radius is reduced, the resistance of the bend will increase and the volume of the air being extracted will decrease (image on the left)
Ensure flexible ducting is installed without peaks or troughs (image on the right)

4" Lo-Watt™ Range

The Lo-Watt range of wall fans can dramatically reduce power consumptions by using a DC motor which uses less energy compared to a normal fan.

Cat No.	Product Type
LW100S	Lo Watt Standard fan
LW100T	Lo Watt Timer Fan incorporating a 1-20 mins over run

Safety Extra Low Voltage (SELV) includes fan and transformer

SELVLW100S	Lo Watt standard fan
SELVLW100T	Lo Watt Timer Fan incorporating a 1-20 mins over run

Lo-Watt Whole House Ventilation System

With the growing concerns about over ventilating properties, the Multispeed Multivent offers the option of 'Close Control' both in the residential and the commercial sectors. With a DC motor that can be set to ventilate any area up to 118 l/s, the Multispeed Multivent is one of the most efficient central extract units in the UK.

The unit has 3 fully variable speeds: normal, boost and purge. The digital display allows accurate setting of airflow, ensuring exactly the right ventilation rate. Accurate speed control helps minimise noise and energy consumption.

Meets the building regulations document (F1) for continuous running.

Quiet Fan Range

Domestic Range

QF100

The Manrose Quiet Fan is the latest in domestic ventilation to incorporate a high extraction rate whilst producing an incredibly quiet running volume. Designed for wall and ceiling mounting, this comprehensive range is ideal for bathrooms and toilets.

The unit also comes complete with a performance enhancing turning vane system located in the spigot to improve performance by maintaining a high output.

- High quality, long life motors continuously rated and warranted for a minimum of 30,000 hours or 3 years
- Decibel Level of ONLY 27dB(A) at 3m. Over 60% reduction in comparison to standard 4" (100mm) domestic fans
- An impressive extraction rate of 75m³/hr, 21 litres per second
- Low energy motor with a maximum consumption of 5 Watts
- Low SFP of just 0.33W/l/s
- Complete with integral backdraught shutters
- Complies with both Part F & L

QF100 75m³/hr, 21 litres per second

Packaging

Quiet fan range packed in outers of 10. Contact our technical department for packaging dimensions.

Electrical

220-240V~50Hz AC Single Phase consuming 5 Watts. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted. The fan must not be accessible to a person using either the shower or bath and mounted a minimum of 1.8 metres from the floor.

Additional Data

Maximum Pressure: 23 p.a.

Fan Speed: 2300 r.p.m.

Sound Volume: 27 dB(A)

Maximum Operating Temperature: 40°C

Quiet Fan X5 Conceal Domestic Range

QF100 X5 CONCEAL

The Manrose Quiet Fan X5 Conceal is the latest in domestic ventilation to incorporate a high extraction rate whilst producing an incredibly quiet running volume all with the additional flexibility of being IPX5 compliant. IEE Regulations (U.K.) allow for IPX5 fans to be installed into zone 1 without the need for low voltage transformer making this comprehensive range ideal for bathrooms and toilets.

The unit also comes complete with a performance enhancing turning vane system located in the spigot to improve performance by maintaining a high output.

- IPX5 rated for compliant zone 1 installation
- High quality, long life motors continuously rated and warranted for a minimum of 30,000 hours or 3 years
- Decibel Level of ONLY 28dB(A) at 3m.
- Manufactured using high gloss ABS thermoplastics for strength and durability
- An impressive extraction rate of 75m³/hr, 21 litres per second
- Low energy motor with a maximum consumption of 6 Watts
- Low SFP of just 0.29W/l/s
- Complete with integral backdraught shutters
- Complies with both Part F & L
- Suitable for ceiling or wall mounting
- Made in the UK

Packaging

Quiet fan IPX5 range packed in outers of 10. Contact our technical department for packaging dimensions.

Electrical

220-240V~50Hz AC Single Phase consuming 6 Watts. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted.

Additional Data

Flow Rate: 21l/s, 75m³/hr

Sound Volume: 28 dB(A)

Maximum Operating Temperature: 40°C

Operating wattage: 6W

Warranty: 3 years

IP Rating: IPX5, Zone 1 Compliant

Quiet Fan X5 Domestic Range

- IPX5 rated for compliant zone 1 installation
- High quality, long life motors continuously rated and warranted for a minimum of 30,000 hours or 3 years
- Decibel Level of ONLY 25dB(A) at 3m.
- Manufactured using high gloss ABS thermoplastics for strength and durability
- An impressive extraction rate of 90m³/hr, 25 litres per second
- Low energy motor with a maximum consumption of 6 Watts
- Low SFP of just 0.24W/l/s
- Complete with integral backdraught shutters
- Complies with both Part F & L
- Suitable for ceiling or wall mounting

Quiet Fan Conceal Range

Domestic Range

CQF100

The Manrose Quiet Fan Conceal offers a low sound level of only 27dBA, has a tile like front cover, and is now available as a humidistat model.

Designed for wall and panel mounting, this comprehensive range is ideal for bathrooms and toilets.

The unit also comes complete with a performance enhancing turning vane system located in the spigot to improve performance by maintaining a high output.

- High quality, long life motors continuously rated and warranted for a minimum of 30,000 hours or 3 years
- Manufactured using high gloss thermoplastics for strength and durability
- Decibel Level of ONLY 27dB(A) at 3m. Over 60% reduction in comparison to standard 4" (100mm) domestic fans.
- An impressive extraction rate of 75m³/hr, 21 litres per second
- Low energy motor with a maximum consumption of 7 Watts
- Complete with integral backdraught shutters
- New Humidity controlled version with fixed over run

Gold Range

Domestic Range

MG100/MG150

The Manrose Gold range extractor fans are installed with a high quality ball bearing motor. This unique design feature promotes the life of the fan ventilating your home twice as long and quietly.

- 5 year no quibble guarantee.
- Longer lasting ball bearing motor.
- Available in 2 sizes, 100mm (4") and 150mm (6").
- Suitable for wall or ceiling mounting.
- Complies with the building regulations.
- Manufactured using high gloss ABS thermoplastics for strength, durable and easy cleaning.
- The Gold range is designed for wall or ceiling mounting (pullcord wall mounting only). These fans can be window mounted using our window kit available separately.

Continuum Axial Fan Range

Domestic Range

CONTINUUM AXIAL FAN

100mm Continuous running panel axial fan for bathrooms and kitchens. Discreet styling with flat facia reducing the impact the fan has on interior design. Suitable for wall or panel mounting using the appropriate fixing kit.

Designed to comply with Building Regulations for whole house system ventilation, this sleek fan can be used in a wet room under System 3 of Building Regulations Approved Document F.

This attractive fan is also very energy efficient running at just 3.5W on trickle speed.

- Provides required performance to fulfil building regulations for continuous operation. Trickle speed 8 l/s, Boost speed 15l/s.
- Panel or Wall mounting.
- Timer control model and New Humidity controlled model with fixed timer.
- Very quiet continuous speed - only 15 dBA running.
- Only 3.5W on trickle.

Why choose continuous running fans?

Continuous running fans, like the Continuum range, have been designed to meet the requirements of the Building Regulations for bathrooms, kitchens, utility rooms and toilets (other models available). The fan is designed to run all of the time, keeping homes fresh, healthy and free from condensation.

What does it do?

The fan is designed to run continuously at a very low rate and boost automatically when required. The low running rate means it has extremely low noise levels. In addition even though the fan will be running continuously, running costs will still be low because this fan costs less to run than a low energy light bulb!

How will it help?

This fan will help prevent the build-up of moisture in the home by removing steam and odours. This will help reduce the risk of black mould forming on walls and behind cupboards.

100mm (4") Wall/Ceiling Fans

XF120S	Standard model for remote switching
XF120P	As above supplied with pullcord switch
XF120T	Timer model incorporating integral adjustable electronic timer (1-20 mins)
XF120TP	As above but with pullcord override switch. Requires no switched live
XF120H	Humidity control which is adjustable between 40% RH and 95% RH Complete with integral adjustable timer (1-20 mins)
XF120HP	As above but with pullcord override switch. Requires no switched live
XF120PIR	PIR activated model which switches on as a person enters the room and runs on after the room is vacated. There is no need to connect to a separate switch Timer adjustable between 1-20 mins. Requires no switched live

100mm (4") WINDOW FANS

WF120P	Pullcord model
WF120T	Timer model incorporating integral adjustable timer (adjustable 1-20 mins) Complete with pullcord switch
WF120H	Humidity control which is adjustable between 40% RH and 95% Complete with integral adjustable timer (1-20 mins)
WF120PIR	PIR activated model which switches on as a person enters the room and runs on after the room is vacated. There is no need to connect to a separate switch Timer adjustable between 1-20 mins. Requires no switched live

Dimensions (mm)

PRODUCT	A	B	C	D
XF120	182	118Ø	46	32
WF120	182	60	32	

Performance Graph

XF/WF120 Series 130m³/hr, 36 litres per second

Packaging

XF120 Series in outers of 10 measuring 400mm x 215mm x 490mm - weight 8 kgs

WF120 Series in outers of 10 measuring 446mm x 225mm x 550mm - weight 10 kgs

Installation

XF120 Series designed for wall or ceiling mounting, (pullcord wall-mounting only).

WF120 Series designed for window mounting through a standard 140mm - 150mm Ø hole.

Electrical

220-240V~50Hz AC  Single phase consuming 15.5 Watts. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted. The fan must not be accessible to a person using either the shower or bath and mounted a minimum of 1.8 metres from the floor.

Additional Data

120mm (5") Range

Maximum pressure: 35 p.a.

Fan speed: 2000 r.p.m.

Sound volume: 41.0 dB(A)

Maximum operating temperature: 40°C

150mm (6") Fan Range

Domestic Range

XF150B / WF150B

- Designed for wall, ceiling or window mounting, the efficient and easy to install range of 150mm (6") extractor fans are available in twelve options, and are an alternative style and design to the traditional 6" kitchen style.
- The fans are suited to larger bathrooms, utility rooms, shops, offices, restaurants, etc. Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- The extract rate for the 150B Series is 230m³/hr, 64 litres per second.
- Incorporating the latest technology and design, Manrose can now offer a complete family of 100mm (4"), 120mm (5") and 150mm (6") fans, all with the same styling.
- The units are all manufactured using high gloss ABS thermoplastics for strength, durability, aesthetics and easy cleaning.
- Designed to comply with the Building Regulations on Ventilation (F1).

Automatic Shutter Fan Range

Domestic Range

XF/WF100A/120A/150A

- Designed for wall, ceiling or window mounting, the Automatic extractor fan range is available in ten options, all incorporating thermo-activated internal shutters behind the interior grille which open silently approximately 45 seconds after the fan is switched on.
- The range is available in three sizes - 100mm (4"), 120mm (5") and 150mm (6").
- The extract rate of the 100mm series is 85m³/hr, 23 litres per second, whilst the 120mm units for larger bathrooms, toilets and utility rooms are 56% more powerful with an impressive extract rate of 130m³/hr, 36 litres per second. The largest fan in this range, the 150mm (6"), has a maximum performance of 230m³/hr, 64 litres per second.
- Power is provided by a single phase induction motor with pre-oiled bearings for a maintenance-free life.
- The units are all manufactured using high gloss ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Designed to exceed the Building Regulations on Ventilation (F1).

Lo-Watt™ Range

80% energy saving

Domestic Range

LW100/SELV LW100

- The Lo-Watt fan is designed for wall mounting only.
- Standard & timer versions available.
- Reduces power consumption.
- Uses up to 80% less energy compared to a standard fan.
- Lower running costs.
- SELV (Safety Extra Low Voltage) models also available.
- Quiet and efficient, the 100mm (4") series has an impressive extract rate of 75m³/hr, 21 litres per second.
- The units are all manufactured using high ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Designed to comply with the Building Regulations on Ventilation (F1).
- SFP (Specific Fan Power) 0.29

Building Regulations - Domestic

The Building Regulations introduced in 2010 – Domestic dwellings, gives the recommended Watts per litre per second (W/l/s) for each type of fan, to be used in new buildings.

Our range of Lo-Watt fans are specifically designed to meet the regulations.

Table 32: Minimum provisions for mechanical ventilation systems

	Standards for new and replacement systems information	Supplementary information
1.0 Fan power	a. Mechanical ventilation systems should be designed to minimise electric fan power. Specific fan power (SFP) should not be worse than: i. 0.5 W/l/s for intermittent extract ventilation systems; ii. 0.7 W/l/s for continuous extract ventilation systems; iii. 0.5 W/l/s for continuous supply ventilation systems; iv. 1.5 W/l/s for continuous supply and extract with heat recovery ventilation systems.

12 Volt SELV Fan Range

Safety Extra Low Voltage Bathroom/Shower Extractor Fans

Domestic Range

LOW VOLTAGE RANGE 100/120/150MM

- Designed for wall, ceiling or window mounting, the 12 Volt SELV fans are available in three diameters - 100mm (4"), 120mm (5") and 150mm (6") and in seven options.
- Suitable for mounting within the splash area of a shower or bath (where current regulations prevent the use of conventional fans), the 12 Volt fan is a standard model manufactured with a 12V - 50Hz shaded pole motor. The transformer and switching mechanism is mounted remotely either in the roof space or high on the ceiling next to the pullcord switch. Pullcord, humidistat, PIR and versions have to be mounted inside the room where the fan is installed and out of the reach of the person using the bath or shower.
- A Centrifugal 12 Volt fan is available, fitted with a backward curved centrifugal impeller for large airflow against the high pressures caused by longer lengths of ducting and resistance by grilles.
- The extract rate of the 100mm (4") model is 85m³/hr 23 litres per second, the 120mm (5") 130m³/hr 36 litres per second and the 150mm 230m³/hr 64 litres per second.
- The CF200LV centrifugal fan has an extract rate of 110m³/hr 31 litres per second.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to exceed the Building Regulations on Ventilation (F1).

MANROSE®

T12/LT12 Series Remote Transformer Range

Domestic Range

T12/LT12

- Designed to power 12V low voltage fans installed in the splash area of the shower or bath, the T12/LT12 series of Safety Extra Low Voltage (SELV) transformers can be mounted in the loft area (not Pullcord, Humidistat or PIR models) or high-up on the ceiling next to the pullcord light switch.
- There are 14 models in the range, all fitted with a neon light and complete with pattress.
- The units are manufactured using impact resistant, high gloss ABS thermoplastics for strength, durability and easy cleaning.

Technical Details

Cat. No.	Product type
T12S/LT12S	Standard model for remote switching
T12P/LT12P	As above supplied with pullcord switch
T12T/LT12T	Timer model incorporating adjustable integral electronic timer (1-20mins)
T12TP/LT12TP	As above with pullcord override switch. Requires no switched live
T12H/LT12H	Humidity control which is adjustable between 40 and 95% RH. Complete with integral adjustable timer (1-20 mins)
T12HP/LT12HP	As above with pullcord override switch. Requires no switched live.
T12PIR/LT12PIR	The fan requires no switched live, has no requirement to connect to a separate switch and has an adjustable timer (1-20 mins). PIR Activated model which switches on when the room is entered and runs on when the room is vacated.

LT models are for use with 150 Range and CF200LV

Shower Zone Diagram

Packaging

Packed in oufers of 10 measuring 313mm x 97mm x 126mm - weight 10kgs.

Electrical

Input 220-240V - 50Hz  Output 12volt AC. 50Hz 25VA S.E.L.V. 35VA on LT Series. Must be mounted out of reach of the person using the bath or shower. These appliances are double insulated and do not require an earth, but must be connected to the supply through a suitable double pole isolating switch with a minimum contact gap of 3mm on fixed wiring circuits. The protective fuse must not exceed 3A and installation must be supervised by a qualified electrician. See zone diagram for transformer zone rating.

Transformer

Construction of transformer in accordance with EN60742.

- Zone 0: The interior of the bath or shower tray.
- Zone 1: The exterior of the bath or shower tray to a height of 2.25 metres above the floor.
- Zone 2: Extends to 0.60 metres beyond Zone 1 to a height of 2.25 metres above the floor.

LED Showerlite Range

Domestic Range

LEDCLKTC/IWLEDCLKTC

Our 100mm Part L compliant shower light fan now comes with an 3W LED lamp. Our LED lamp consumes 90% less power than the standard dichroic lamp!

- The Manrose LED Showerlite is a distinctive shower light which is incorporated into a circular diffuser, suitable for showers and bathrooms. Available in 100mm (4").
- Warm or cool light options.
- The LED Showerlite can be used within the splash area of the shower or bath and is powered by a SELV LED Driver.
- Part F and L compliant with a specific fan power down to 0.43 W/l/s.
- Available in two colours; white and chrome, the Manrose LED Showerlite will enhance any shower or bathroom providing a rich warm glow of soft light.
- The LED Showerlite is available in boxed carton packaging. Each pack is supplied complete with fan, Showerlite unit, LED Driver, one length of PVC flexible ducting, external wall grille, fixing screws, plugs and straps.

CFD200/220 In-line Centrifugal Fan Range

Domestic Range

CFD200/220 & SLCFD

- Providing solutions for a wide range of domestic and commercial applications, the CFD200/220 in-line fan has been designed for use with suspended ceilings. A spring operated, non-return flap is built into the discharge spigot to prevent back draughts.
- Powerful, yet quiet and unobtrusive, the CFD200/220 units have extract rates of 110m³/hr 31 litres per second.
- The CFD series is suitable for a wide range of applications including bathrooms, toilets, shower rooms and utility rooms.
- The CFD series is fitted with backward curved centrifugal impellers for a large airflow against the high pressures caused by longer lengths of ducting and resistance by grilles.
- The CFD200/220 units are manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Available with an integral mounting bracket. Designed to comply with the Building Regulations on Ventilation (F1).
- The CFD200/220 range is powered by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- The Shower Kit comprises of the CFD200 centrifugal in-line fan unit, 6 metres of PVC ducting and wall grilles.
- The Showerlite Kit comprises of the CFD200 centrifugal in-line fan unit, 6 metres of PVC ducting and wall grilles together with a chrome Showerlite fitting and transformer.

Professional Showerlite Fan Range Domestic Range

PROCFLKCLE/PROCFLKLC

The complete Professional Showerlite fan kit is now quieter and more powerful than ever before. It includes everything you require to provide an effective and powerful way to extend the ventilation in your bathroom or any other area in your house. The first in-shower ventilation kit incorporates seven different pieces of ventilation equipment within one kit.

The Halogen & LED kits include:

- 1 A powerful high performance In-line mixed flow fan. This is capable of extracting 245m³/hr 68l/s, which exceeds the Building regulations. A bracket is also included for easy fan installation in the roof.
- 2 An attractive powerful 120mm/5" Showerlite with a built in extended reducer, to reduce to 100mm/4". The Showerlite fan has an attractive chrome finish and is a sealed unit for total IP waterproof protection. It provides a rich warm glow of soft light to enhance any bathroom.
- 3 One additional inlet; this is a circular internal white grille which has a unique design, and will fit unobtrusively into any room.
- 4 10 metres of 100mm/4" flexible PVC ducting. This long length enables you to adapt the installation in any size room.
- 5 An external wall grille; the in-line fan extracts through the egg crate wall grille, which fits into the external soffit.
- 6 A PVC T-Piece connector which connects the PVC ducting to the in-line fan, internal grille and Showerlite.
- 7 A safety extra low voltage (SELV) transformer, to power the 12 volt showerlite. The complete kit for your total ventilation.

Electrical

LED Models

12 volt DC 3W MR16 lamp.
Powered by an LED Driver.
Input, AC. Output - 12 volt DC. 1A

In-Line MixFlo Fan

220-240V- AC. 50Hz ☐ Single phase consuming 25 Watts. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted.

Transformer

Input 100-240VAC, Output 12VDC 500mA
LED Power 3-5W

Installation

Showerlite Unit

Designed to fit through a 120mm/5" diameter hole with an incorporated reducer to fit 100/4" PVC ducting.

In-Line MixFlo Fan

Induct Fans suitable for in-line systems and designed for use with suspended ceiling systems.

Construction

Showerlite Unit

All plastic components are moulded in high temperature VO rated thermoplastics.

In-Line MixFlo Fan

Strong impact black plastic casing.

Motor

In-Line MixFlo Fan

Single phase induction motor with ball bearings fitted for a long, maintenance-free life and protected by a thermo-auto resetting cut-out approved totally enclosed for protection against dirt and dust. Motors are continually rated.

Additional Data

In-Line MixFlo Fan

Performance: 245m³/h 68l/s
Fan speed: 2200 rpm
Max Operating Temperature: 50°C
Sound Level: 22.0 dB(A)
Weight: 2kg

VENTILATES POWERFULLY & ILLUMINATES SAFELY

MANROSE®

Shower/In-line Fan Range

Domestic Range

SF100/120/150 ID100/120/150

- Designed for the safe ventilation of bathrooms, toilets and shower rooms, the SF/ID 100 (100mm 4") range of in-line extractor fans remove any risk of an electric shock in wet areas as the fan is mounted remotely.
- The SF/ID120 (120mm 5") series of in-line fans have been engineered for the ventilation of larger shower or bathroom areas, and are 56% more powerful than their 100mm counterparts.
- Powerful, yet extremely quiet in operation, the extract rate of the SF/ID100 is 85m³/hr 23 litres per second, whilst the SF/ID120 performs with an impressive 130m³/hr 36 litres per second. Also new to the range is the ID150 Tube Fan, with a top performance of 230m³/hr, 64 litres per second.
- Available with or without a timer, the SF100/120/150 fan kits are supplied complete with a fan unit, one length of PVC flexible ducting, one internal (white) and one external wall grille, fixing screws, plugs and straps to secure the duct to the grilles.
- The ID100/120/150 series comprises a fan unit only and is suitable for boosting another fan where a long run of ducting is used.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to comply with the Building Regulations on Ventilation (F1).

150mm (6") In-line Fan Kit Range

Domestic Range

SF150A/ID150A

- The SF150 series of shower fans have been designed for the safe ventilation of larger shower rooms and bathrooms, or anywhere there is a possibility of contact with water.
- Any risk of an electric shock is removed as the fan is mounted remotely.
- Quiet and unobtrusive, the SF150 has a powerful extract rate of up to 220m³/hr 62 litres per second, depending on the length of ducting used.
- The fans are available separately or as In-line fan kits, which are supplied complete with fixing screws, plugs and straps to secure the duct onto the grilles and the fan unit, whilst the PVC ducting supplied is one 5m length 152mmØ.
- Suitable for use in changing rooms with showers, restaurants, bars and meeting rooms, schools and sports facilities, the SF150 has easy to follow instructions to make installation simple.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, including the internal and external grilles. The flexible ducting is made from PVC reinforced with steel wire.
- Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to comply with the Building Regulations on Ventilation (F1).

Centrifugal Fan Range

Domestic Range

CF100/CF200

- The CF100 and CF200 centrifugal fans use the latest technology to provide extremely powerful, yet very quiet and vibration free ventilation. The CF100/200 ranges are designed for bathrooms, toilets, cloakrooms and utility rooms.
- Designed to move air over long distances, these units will give maximum performance even against pressures caused by long lengths of ducting and resistance by grilles.
- All models are fitted with a built-in spring operated non-return flap into the discharge spigot to stop backdraughts.
- There are seven models in each series. The CF100 has an extract rate of 90m³/hr 25 litres per second, the CF200 range have an extract rate of 110m³/hr 31 litres per second.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power to the CF100/200 range is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to comply with the Building Regulations on Ventilation (F1).

Continuum Centrifugal Fan

Part F & L Approved

Domestic Range

CONTINUUM CENTRIFUGAL

The Continuum fan is designed to provide silent, continuous ventilation to any W.C., bathroom, utility room or kitchen. It can be mounted on walls or ceilings, requires low maintenance, includes a long life, low energy motor and is designed for automatic, trouble free operation.

Provides an alternative to higher priced filterless fans, without compromising on function or performance.

- Low SFP – down to 0.18
- One fan for all rooms - W.C., Bathroom or Kitchen - mains and SELV versions available
- Low energy motor - saving running costs with only 1.5 Watts at trickle speed
- Easy clean and filterless - reducing maintenance
- It is designed for surface or flush mounting due to the unique cassette design of the motor and impeller assembly. The rear spigot can be mounted in 2 positions allowing for rear exit or connecting to a vertical ducted system
- 98mm spigot for speedy installation on any 100mm ducting – Rigid or flexible duct can be used
- Integrated humidity sensor providing automatic operation when needed
- Designed to run continuously with a boost function to comply with Part F & L

Why choose continuous running fans?

Continuous running fans, like the Continuum range, have been designed to meet the requirements of the Building Regulations for bathrooms, kitchens, utility rooms and toilets. The fan is designed to run all of the time, keeping homes fresh, healthy and free from condensation.

What does it do?

The fan is designed to run continuously at a very low rate and boost automatically when required. The low running rate means it has extremely low noise levels. In addition even though the fan will be running continuously, running costs will still be low because this fan costs less to run than a low energy light bulb!

How will it help?

This fan will help prevent the build-up of moisture in the home by removing steam and odours created whilst cooking and bathing. This will help reduce the risk of black mould forming on walls and behind cupboards.

Technical Details

Cat. No.

Product type

CRCHTP - Mains voltage fan

The fan runs continuously on a trickle speed. An optional single boost speed (two speeds available, lower or higher boost dependant on requirement) can be selected at installation.

CRCHTPLV - SELV fan

The integral pullcord switches the fan on and off to the selected boost speed.

An integral, adjustable humidity sensor will also boost the fan to the selected speed. An integrated overrun timer activates when the humidity drops to the pre-set level.

An integrated switch live also enables remote switching to boost. When the remote switch is deactivated the fan will also overrun for the period set at installation.

The LED will come ON when either the switched live, pull cord or humidity sensor is activated.

Packaging

Continuum in outers of 10 measuring 753mm x 283mm x 390mm – weight 12kgs

Installation

Designed to be mounted on walls or ceilings and discharged through a 100mm (4") standard rigid or flexible duct, also suitable for use with flat duct channel systems. Comprehensive wiring and installation instructions are included with each fan.

Electrical

220-240 V/AC. 50Hz single phase powering a DC motor consuming 1.5W on trickle, 2.5W on low boost and 8W on high boost. These fans are double insulated and do not require an earth. All wiring must comply with current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3amp fuse fitted. The fan should not be accessible to a person using either the shower or bath and mounted to a minimum of 1.8 metres from the floor.

Surface Mount

M200 Centrifugal Fan Range

Domestic Range

M200S

The M200 range of centrifugal bathroom fans are designed for ducted ventilation of internal bathrooms and WCs.

M200 is designed for surface or flush mounting due to the unique cassette design of the motor and impeller assembly. The rear spigot can be mounted in 2 positions allowing for rear exit or connecting to a vertical ducted system.

Designed for wall or ceilings mounting and discharging via rigid, flexible or flat ducting.

Available as a wall model with the addition of a wall fitting kit.

- 98mm spigot for speedy installation
- Available in Standard, Pullcord, Timer and Humidity versions
- Provides required performance of 54m³/h (15l/s) to comply with the Building Regulations (Document F). Also available as part of the Part L compliant range.
- Flush or surface mountable
- Adjustable rear or side exit spigot

150mm (6") Wall and Window Fan Range

Domestic Range

XF150/WF150

- Designed to work effectively in kitchens, the 150mm (6") axial flow kitchen fans are quiet, efficient and can be wall, ceiling or window mounted.
- Incorporating the latest technology, the 150 series has been designed for simple installation and has a powerful extract rate of 230m³/hr 64 litres per second for the XF version and 220m³/hr 62 litres per second on the WF150.
- The range is ideally suited to use in domestic and commercial applications including kitchens, utility rooms, restaurants, hotels, offices and shops. The WF150 range is suitable for window mounting.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a single phase induction motor with pre-oiled bearings for a long, maintenance-free life.
- Designed to comply with the Building Regulations on Ventilation (F1).

Installation

The XF150/150A series of 150mm (6") extractor fans can be wall or ceiling mounted (not pullcord models), and there are two models available in this range. The XF150 model has a fixed louvre internal grille, whilst the automatic model the XF150A, has thermo-activated internal shutters which open 45 seconds after the fan has been switched on (except the manual pullcord operated model XF150AP).

WF150/WF150A this series has been designed for window or wall fixing through a standard 170-184mm (51/2"-71/4") hole. There are two variations in the range, the base model with fixed louvres for additional trickle flow ventilation and the automatic model incorporates thermo-activated internal shutters (except the pullcord operated model WF150AP).

Electrical

220-240V~50Hz AC  Single phase consuming 25W. These fans are double insulated and do not require an earth. All wiring must comply with the current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted. The fan should not be accessible to a person using either the shower or bath and mounted a minimum of 1.8m from the floor.

230mm (9") and 300mm (12") Window Fan Range Commercial Range

WF230/WF300

- Suitable for a variety of domestic and commercial applications, the WF230 range has been designed for window or wall mounting. Incorporating the latest ventilation technology and stylish design, these high performance extractor fans have an extract rate of 668m³/hr, 185 litres per second.
- There are three models in the range starting with the basic unit (WF230) which has fixed louvres, can be supplied with an optional pullcord switch and provides a natural source of trickle flow ventilation when the fan is switched off.
- Manual models (WF230M) have pullcord operated internal backdraught shutters that also start the fan.
- The WF230 automatic series have thermo activated shutters which open silently 45 seconds after the fan has been switched on.
- Completing the Manrose family the WF300 range of 300mm (12") fans give a powerful extract rate of 1100m³/hr, 306 litres per second.
- The WF300 is designed for window mounting and can also be wall mounted using our wall mounting fixing kit.
- The WF300 has three models in its range. The basic model with fixed louvres, the manual model with internal pullcord operated backdraught shutters and the automatic model with thermo-activated internal shutters which open silently and automatically when the fan is switched on.
- These high performance extractor fans are easy to install and are attractively styled in high gloss ABS thermoplastics for durability, ease of cleaning and maintenance and cover a wide variety of domestic and commercial applications including kitchens, utility rooms, pubs, restaurants, offices, shops and factories.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a four pole single phase induction motor with pre-oiled bearings, totally enclosed for protection against dust and dirt, for a long, maintenance-free life.
- There is an extensive range of ventilation accessories including speed controllers and roof-termination kits, available separately.
- Building Regulations on Ventilation (F1).

WF300 Series

1100m³/hr, 306 litres per second

Packaging

WF230 Series in outers of 1 measuring 301mm x 156mm x 345mm - weight 3.5kgs

WF230 Series in outers of 5 measuring 780mm x 301mm x 345mm - weight 17.5kgs

WF300 Series in outers of 1 measuring 387mm x 187mm x 446mm - weight 6 kgs

WF300 Series in outers of 5 measuring 895mm x 387mm x 446mm - weight 30 kgs

Installation

The WF230 series has been designed for window installation through a standard 260mm Ø hole. A wall fixing kit (Cat. No. 1301) is also available for through wall mounting and comprises wall plugs, screws and a 400mm length of 9" diameter aluminium flexible ducting (when extended).

The WF300 series has been designed to be fitted in a window through a standard 320mm Ø hole. A wall fixing kit (Cat. No. 1299) is also available for through wall mounting which comprises of wall plugs, screws and a 400mm length of 12" diameter aluminium flexible ducting (when extended).

Electrical

220-240V~50Hz AC  Single phase consuming 41W on the 230 series and 68W on the 300 series. These fans are double insulated and do not require an earth. All wiring must comply with the current IEE regulations. A double pole isolating switch, having a contact separation of at least 3mm in all poles, must be used with a 3 amp fuse fitted. The fan should NOT be accessible to a person using either the shower or bath and mounted a minimum of 1.8m from the floor.

230mm (9") and 300mm (12") Wall/Ceiling Fan Range Commercial Range

XFS230/XFS300

- With a unique, slimline profile of only 62mm the XFS230 range will blend unobtrusively into any surrounding decor.
- Designed for wall or ceiling mounting, this series of fans and packs is ideally suited to use in kitchens, utility rooms, pubs, hotels, restaurants, offices, shops and factories.
- There are three models in the range: the basic model with fixed louvres, the manual with internal pullcord operated backdraught shutters and the automatic version with thermo-activated internal shutters which open automatically when the fan is switched on.
- Incorporating the latest ventilation technology, this series has an extract rate of 668m³/hr, 185 litres per second.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning.
- Power is provided by a four pole single phase induction motor with pre-oiled bearings, totally enclosed for protection against dust and dirt, for a long, maintenance-free life.
- This family of fans has been completed with the addition of the XFS300 range of 300mm (12") fans, which offer a powerful extract rate of 1100m³/hr, 306 litres per second and are available in the same formats as the XFS230 series.
- Designed to comply with the Building Regulations on Ventilation (F1).

Technical Details

Cat. No.

Product type

XFS230/300 Basic model has fixed louvres. This unit will also provide a natural source of trickle flow ventilation when the fan is switched off

XFS230/300P As above with pullcord switch

XFS230/300MP The manual models have pullcord operated internal backdraught shutters, which also start the fan motor unit

XFS230/300A The automatic versions have thermo-activated shutters which open silently approximately 45 second after the fan has been switched on

ACCESSORIES

COMTSCVR Variable Speed Controller Intake-Extract with neon light for 230mm (9") and 300mm (12") fans

For one step installation consider using 1291-9" or 1292-12" wall vent kit. To go straight through the wall.

Commercial Series Wall Fan Range

Commercial Range

COMT/TK150/230/300

- The commercial series of built-in wall fans has been designed for flush fitting into external walls, fitting through most wall thicknesses using zinc coated metal telescopic wall liners. Installation is made simple in solid or cavity walls 155–300mm thick, or in walls up to 553mm thick using an extension sleeve.
- The extractor fan unit and internal grille are also available separately as they are designed to retro fit into most leading commercial wall fan liners, which minimises the need for making good and redecoration or removal of existing wall liners.
- The internal and external grilles are a single tough moulding. This greatly reduces vandalism and increases building security whilst only 23mm in profile. They have a 50mm flange for a smooth finish, which will blend unobtrusively into most backgrounds.
- Incorporating the latest ventilation technology and stylish design, these high performance extractor fans have an extract rate up to 278m³/hr, 77 litres per second for the 150mm unit, 668m³/hr, 185 litres per second for the 230mm units and 1100m³/hr, 306 litres per second on the larger 300mm.
- In the 230mm and 300mm models power is provided by a 4 pole single phase induction motor with pre-oiled bearings for a long, maintenance free life. The 150mm version is fitted with a shaded pole motor with ball bearings.
- Models in the range include the standard unit, which has fixed louvres that also provide a natural source of trickle flow ventilation when the fan is switched off. The automatic model with thermo-activated internal backdraught shutters open shortly after the fan has been switched on.
- There is a variable speed and airflow direction option available on the 230mm and 300mm units, using the new stylish Manrose speed controller. This can be flush mounted into a standard single gang 35mm deep metal wall box.
- Designed for heavy-duty and extensive usage, the commercial units provide excellent ventilation in public and commercial sector applications such as hospitals, schools, railway stations, restaurants, public houses, offices, hotels and factories.
- The units are all manufactured using high impact ABS thermoplastics for strength and durability, aesthetics and easy cleaning. ABS is an easily recyclable material.
- Designed to comply with the Building Regulations on Ventilation (F1).

The models shown are in white for photographic purposes only, models will be supplied in pebble grey

Commercial Series Window Fans

Commercial Range

COMMERCIAL SERIES COMG150/230/300

- MANROSE Commercial Window Fans are available in three sizes, 150mm (6"), 230mm (9") and 300mm (12").
- The stylish internal louvre incorporates the internal shutters which are built into the grille so the internal profile of the fan is less obtrusive. These elegant and stylish units will blend into the background and cover a wide variety of commercial applications such as pubs, restaurants, hotels, offices, shops and factories.
- They are also suitable for use in public sector areas such as service stations, hospitals, schools and railway stations and are designed for heavy usage. Available in a soft neutral grey or traditional white, they will blend in with most decors and surroundings.
- Another feature of the range is that on the grey models the external grille is moulded in a dark grey so it will not be too obtrusive on the window line, and blend into the background. The grey commercial series does not require as much cleaning as their white counterparts.
- Available with automatic shutters or pullcord operated shutters.
- Tested to comply with the Building Regulations on Ventilation (F1).

Commercial Series Wall/Ceiling Fans

Commercial Range

COMMERCIAL SERIES COMCW150/230/300

- The Manrose Commercial Range now incorporates surface wall and ceiling mounted models. Available in 150mm (6") 230mm (9") and 300mm (12"). This range of Spigot Fans gives the unit a unique slimline profile of 66mm on the 150mm (6") series up to 81mm on the 300mm (12") series, and are suitable for connecting to Ducting. Available in soft neutral grey, they cover a wide range of commercial applications and public service sectors.
- As with their window counterparts the shutters are incorporated into the internal louvre which protects the shutters from vandalism.
- The series now incorporates the latest ventilation technology and a new stylish design the commercial range has an extract rate of 278m³/hr, 77 litres per second for the 150mm (6") unit 668m³/hr, 185 litres per second with the 230mm (9") unit and 1100m³/hr, 306 litres per second on the larger 300mm (12") units.
- These fans are all manufactured using high impact ABS thermoplastics for strength and durable aesthetics. The easy cleaning ABS is also of recyclable material. For 230mm (9") and 300mm (12") models power is provided by a 4 pole single phase induction motor with pre-oiled bearings for a long maintenance free life. The 150mm (6") version is fitted with a shaded pole motor with ball bearings.
- Also available are stylish speed controllers on the full range. The COMTSCV variable speed controller is suitable for the 150mm (6") series. While the COMTSVR variable / reversible controller is suitable for 230mm (9") and 300mm (12") series.

MixFlo Range

Commercial Range

MF100/MF125/MF150/MF200

These powerful in-duct mounted mixed flow fans have been designed to produce higher working pressures for applications that require high air flows, with low relative noise.

MixFlo fans can be mounted in a variety of applications and are suitable for use with either rigid or flexible ducting.

- High quality ball bearing, long life motors, continuously rated and warranted for a minimum of 30,000 hours or 3 years
- High air flows are achieved through flexible duct
- Compact overall dimensions
- All models 3 speed settings selected via internal dip switch
- Double Insulation - no earth required
- Fully Building Code compliant
- Fully BEAB approved rated to IPX4
- Easy installation and maintenance with the fan assembly easily removed from rigid ducting installations using the specially designed construction

MET In-line Centrifugal Fan Range

Commercial Range

MET100/125/150/200/250/315

Designed for a wide range of commercial and industrial applications, offering high airflow performance in a choice of duct sizes.

Powerful and unobtrusive, the MET range have extract rates for many applications. Supplied with mounting feet for horizontal or vertical mounting.

A comprehensive range of ventilation accessories available to cover most ducted applications.

MET range incorporates a backward curved centrifugal impeller designed for large airflow against the resistance experienced in longer duct lengths. All models have 30mm long inlet and discharge spigots for easier duct work connection.

Designed for use with electronic speed control.

FAST DRY MAN/E88AE

- 10 second drying time
- No touch infrared detection
- Unique blue dry zone indicator
- 70% energy saving
- 220-240V/1/50Hz
- Power: 1.6kW at 240V
- 277 x 201 x 175mm (H x W x D)
- Sound: 74 dB(A) @ 1m
- Weight: 7.0kg
- CE approved

Cat. No.	Cover
MAN/E-88AE	White Steel
MAN/E-88AEB	Stainless Satin Steel
E88AEC	Stainless Satin Chrome

Applications - Hand Dryers only

The model MAN/M-88A is suitable for use within office and commercial organisations, such as clinics and catering establishments. They are not recommended for use in public areas prone to vandalism, for example public lavatories and unsupervised areas.

All other models are suitable for use in public areas such as lavatories, factories, schools, railway and motorway service stations and are designed for heavy usage and unsupervised areas.

FAST DRY MAN/500

- 10 second drying time
- No touch Infra-Red detection
- Unique blue dry zone indicator
- 70% energy saving
- 220-240V/1/50Hz
- Power: 1.3kW at 240V
- 260 x 180 x 152mm (H x W x D)
- Sound: 72 dB(A) @1m
- Weight: 3.0kg
- CE approved

HAND SANITISER

- Touchless operation to reduce cross contamination and spread of germs
- Sensor range: 3-10cm
- Gel hand sanitiser and liquid soap
- Lockable via a key to prevent tampering
- Easy to view window for replenishment
- Bulk fill unit
- Weight: 700g
- 1100ml capacity
- 1ml delivery shot
- Battery operated, 6V (4 X AA batteries)
- 70,000 cycle battery life

Cat. No.	Cover	Operation
MANSAN1L	ABS plastic	No touch Infra Red detection

ManiVent

Whole-house ventilation system

Specialist Range

MANI3000N

The ManiVent is an ultra slim whole-house ventilation system incorporating features designed to make installation and commissioning simpler and cost effective.

It is suitable for simultaneous ventilation of separate wet areas in a house or flat gathering wet polluted air and discharging it to atmosphere.

The unit has three integral speed settings.

The unit can be controlled via a remote switch or sensor which enables the user to select one of three fan speeds depending on their particular requirements.

- Low noise levels – designed for continuous operation.
- Option of wall, ceiling and loft mounting.
- Can extract from up to 5 wet rooms simultaneously.
- Eliminates cross contamination due to continuous operation.
- Fitted with four 100/125mm extract spigots

Meets the building regulations document (F1) for continuous running.

- Toilets 6l/s,
- Bathrooms 8l/s
- Utility rooms 8l/s
- Kitchens 13l/s

Lo-Watt ManiVent DC

Whole-House Extract System

Specialist Range

MANI2000B

- Low carbon footprint.
- Recognised in SAP PCDB (Appendix Q)
- Fitted with four extract 125 diameter spigots allowing quick connection to ducts.
- Fitted with a condensate drain for wet areas.
- Option of wall, ceiling and loft mounting.
- Can extract from a number of rooms, depending on the dwelling.
- Improved controllability.

With the growing concerns about over ventilating properties, the Multispeed Multivent offers the option of 'Close Control' both in the residential and the commercial sectors. With a DC motor that can be set to ventilate any area up to 118 l/s, the Multispeed Multivent is one of the most efficient central extract units in the UK.

The unit has 3 fully variable speeds: normal, boost and purge. The digital display allows accurate setting of airflow, ensuring exactly the right ventilation rate. Accurate speed control helps minimise noise and energy consumption.

Meets the building regulations document (F1) for continuous running.

Lo-Watt Whole House Heat Recovery

The Windsor Range

MANHR4500

As the current climate pushes for further ways of saving energy, the Whole-House Heat Recovery System provides a powerful extraction whilst maintaining a 91% heat recovery rate. The intake & extract unit comes complete with washable G3 filters, and updated for 2016 there is now a Thermal Bypass available.

Features & Benefits

- DC motor
- Suitable for apartments and houses
- Recognised in SAP Appendix Q (PCDB)
- 91% heat recovery
- Lo-Watt Consumption
- Lightweight and easy to install
- Low noise
- Washable G3 filters
- LED status indicator
- Push-button on-unit commissioning controller
- Automatic frost protection
- ErP compliant
- Thermal bypass
- Pre-fitted four core mains cable

Technical Details

The Manrose range of electrical accessories are designed to upgrade the switching mechanism of any standard fan providing that the electrical load is not less than 20 Watts or more than 200 Watts. A complete range of options are available in these remote control wall-mounted units.

Fan Isolating Switch

3 pole, 1 gang fan isolating switch.

Cat. No.	Description
1346	Fan isolating switch

Boost Speed Switch

For the Manrose range of heat recovery units.

Cat. No.	Description
MANHR1345	Boost speed switch

Timer Model

Incorporating an electronic time delay switch which allows the fan to run on after the room has been vacated and is easily adjustable between 1-20 mins. Fits single pattress 20mm deep.

Cat. No.	Description
1351	Remote timer control

Humidistat Models

Designed to operate the fan when the relative humidity reaches a pre-set level. This unit is adjustable between 20-90% RH and comes complete with an on/off switch which fits a double pattress. Also available with adjustable timer. Fits single pattress 20mm deep.

Cat. No.	Description
1361	Remote humidistat control and timer. Fits into a single pattress 20mm deep over run timer

P.I.R Model

Passive infra-red model, sensitive to movement will switch the fan on when someone enters the room and off when the room is vacated. The unit also incorporates a time delay switch, which requires no switched live and is energy efficient. Range 5 metres. Fits into a single pattress 20mm deep.

Cat. No.	Description
1362	Remote P.I.R. sensor control

Electrical Speed Controllers

FAN SPEED CONTROLLERS

Technical Details

Manrose offer a wide range of variable, 2 speed controllers with reversible options. Consult our technical department for full details.

Fan Speed Controllers - Non Reversible

The variable non-reversing fan speed control is suitable for controlling the speed of fans providing that the electrical load is not less than 20 Watts or more than 200 Watts. Fits single pattress 20mm deep. A two speed non reversing controller is also available.

Cat. No.	Description
1350	Variable fan speed controller
COMTSCV	Variable fan speed controller

METCON

Single phase variable Non Reversible speed controller for use with in-line commercial fans. MET and MF series. Not suitable for timer models.

Cat. No.	Description
METCON	Speed controller 1.7amp

Fan Speed Controllers - Reversible

Suitable for WF/XF230/300/COMT/TK/CW/G (except MP models) range. Twin speed and variable speed options available.

Cat. No.	Description
1349	Reversible speed controller (variable)
COMTSCVR	Reversible speed controller (variable)
1348	Two speed reversible controller (230mm 9" and 300mm 12" fans)

NEW

Deluxe Quick Internal Fit Wall Kit Domestic Range

DELUXE QUICK INTERNAL FIT WALL KIT

The NEW Manrose Deluxe Quick Internal Fit Wall Kit can be installed entirely from the inside of a property, reducing installation time and removing the need for costly and time consuming external grille fitting involving scaffolding.

This innovative new wall kit includes an adjustable wall liner and external grille with a rubber seal on the outside of the building.

The wall kit can be adjusted to wall thicknesses anywhere between 225mm and 390mm - just measure the wall, then use the guide on the tube of the wall kit to set it to the correct length.

Simply insert the tube into the hole, deploy the external grille and 3 pins will hold the wall kit securely in place. The external grille and seal can then be pulled back against the external wall so a tight fit can be achieved.

The external rubber seal covers up any break-out on the external hole and leaves a clean, tidy finish. In addition, the rubber seal will help to protect against water ingress.

The wall kit is also suitable as a passive air inlet grille.

Patented design.

Technical Details

Cat. No.

DHRIWKW - White

Product type

Deluxe Quick Internal Fit Wall Kit with White external grille and rubber seal.

DHRIWKB – Brown

Deluxe Quick Internal Fit Wall Kit with Brown external grille and rubber seal.

DHRIWKWBS - White

Deluxe Quick Internal Fit Wall Kit with White external grille and rubber seal with Backdraught Shutter.

DHRIWKBBS – Brown

Deluxe Quick Internal Fit Wall Kit with Brown external grille and rubber seal with Backdraught Shutter.

Packaging

All models packaged in outers of 1. Contact our technical department for packaging dimensions.

Installation

Designed to fit through the wall in a 117mm hole with a maximum depth of 390mm and a minimum depth of 225mm. Can be used with any 100mm fan - select model without integral backdraught shutter if fan already has them.

Dimensions (mm)

Min wall thickness: 225mm

Max wall thickness: 390mm

Hole diameter: 117mm

Rubber seal gives neat finish

Locking pins secure wall kit in place

Fixed external grille

Easy to use measurement guide for flexible installation depth

Screw fixings to secure in place

Integral backdraught shutter (BS models)

MANROSE®

Hybrid Radial System Ducting Range

HYBRID RADIAL SYSTEM

Features & Benefits

- Reduces installation time
- Can be applied in SAP as a rigid duct system
- Crush resistant semi-rigid duct
- Unique low-resistance manifolds
- Simple installation through joists

Arterial System

Manrose is pleased to introduce the latest addition to our innovative range of ventilation ancillaries. For use with MVHR systems, the NEW Hybrid Air Distribution System provides a flexible, highly robust solution, which can significantly reduce the installation time when compared to a standard system.

Rigid vs Semi-Rigid Systems

Both traditional duct types have limitations in modern construction. Rigid systems: Passing rigid duct through a floor cassette at right-angles to the joists is time consuming and multiple connections increase the risk of leaking ductwork.

Semi-rigid systems: It can often be difficult to accommodate two distribution boxes and multiple semi-rigid pipe runs in new buildings and the time saving advantages are soon overtaken by the additional cost of materials.

Reduced Installation Time

The Manrose Hybrid range combines the advantages of semi-rigid and traditional rigid ducting in one simple system. The system is independently tested and can be applied in SAP as a standard rigid system. Drops between floors to/from the MVHR unit remain in rigid PVC, having the advantage of low space usage and low cost. Traversing through joists in a floor cassette is much simpler and faster when using semi-rigid duct. The secret to the Hybrid System is the unique low-resistance distribution plenum (Patent Pending) which is sited between joists allowing connection between semi-rigid and rigid sections.

Double Airbrick Adaptor to Rectangular Duct

Fits High Performance Ducting 220 x 90mm to double Airbrick 60905

Cat No.	Product Type	External Dimensions (mm)			Resistance (Pa) at flow rate							
		H	W	D	8 l/s	13 l/s	21 l/s	29 l/s	37 l/s	45 l/s	53 l/s	61 l/s
60977	Double Airbrick Adaptor	-	-	-	-	-	-	-	-	-	-	-

Ducting - Adaptors

Double Airbrick Adaptor to Round Duct

Fits 100/125/150mm Round Pipe

Cat No.	Product Type	External Dimensions (mm)			Resistance (Pa) at flow rate						
		H	W	D	60 l/s	120 l/s	180 l/s				
60954	Double Airbrick Adaptor	-	-	-	-	-	-	-	-	-	-

High Performance Ducting Adaptor

Fits 125 Channel Ducting 220x90mm to High Performance Ducting

Cat No.	Product Type	External Dimensions (mm)			Resistance (Pa) at flow rate							
		H	W	D	8 l/s	13 l/s	21 l/s	29 l/s	37 l/s	45 l/s	53 l/s	61 l/s
60957	Adaptor	-	-	-	-	-	-	-	-	-	-	-

Airbrick Adaptor

To connect Flat Channel Ducting and Airbrick Ventilators

Cat No.	Product Type	External Dimensions (mm)			Resistance (Pa) at flow rate							
		H	W	D	8 l/s	13 l/s	21 l/s	29 l/s	37 l/s	45 l/s	53 l/s	61 l/s

Suitability to comply with these regulations should be determined prior to installation and in conjunction with Building Control Officers. Compliance with the Regulations is specifically excluded from quotations and designs.

Panel Heater with 24/7 timer options Maniheat Heating Range

HP24TIMPH100T/150T/200T

The Manrose 24/7 Panel Heaters connect directly to the permanent electricity supply offering two heat output settings depending on your heating needs. The timer option allows user to select one of 12 pre-set programmes or create a customised 'DIY' heating programme. Wall fixtures are included.

- Silent in operation
- High efficiency of airflow with over 95% of used energy creating heat
- User friendly LCD display screen
- 12 pre-set programmes available
- 1 user defined programme available
- Program and real-time clock memory function
- Thermostat for temperature setting (5°C-30°C)
- Adjustable temperature in Normal and Economic modes
- 24 hour On/Off Timer
- Anti-frosting function
- Ionizer function
- Child safety lock
- Over-heat safety protection
- IP24 Rated

Range Options

Manrose Heated Towel Rails quickly warm and dry towels. Their presence on the wall also adds to the overall style, temperature and comfort of the room.

This comprehensive range of white and chrome towel rails offers 10 different models across the flat, curved and designer ranges. The range offers sizes from 500 x 600mm to 500 x 1500mm available in four heat outputs of 100, 150, 250 and 400W matched to the size of the rail.

Advantages of Towel Rails

Adequately heating your bathroom using a Manrose towel rail not only leaves your towels warm and dry, but helps regulate temperature to the rest of the room decreasing the chances of mould and condensation.

Product Selection

Sizing the correct towel rail can be made easy by using our online heating tool available on the website www.Manrose.com/heating-guide

Style and Comfort

With the Manrose range of towel rails you will find a towel rail to suite all applications and sizes. Every towel rail uses thermally regulated heating elements and a mixture of high inertia fluid in order to maintain even heat distribution around the entire rail.
